

A Fresh Approach Workplace Injuries, Treat for Less & Fund Prevention

WorkWell OnSite Flex Fit Earns Employee Trust, Pays for Itself

WorkWell OnSite Flex Fit offers a new approach to onsite workplace injury care—helping you treat for less and fund prevention with the savings. The solution creates employee engagement in injury prevention and provides an industry first—a payback model based on research.

An Employee Experience that Averts Injuries

WorkWell OnSite Flex Fit focuses on developing personal relationships between employees and physical therapists (PTs). When onsite PTs become familiar faces, employees will reach out for help and coaching ... and know the company cares.

- Asking for assistance faster
- Seeking advice to prevent injuries, right at the job site
- Appreciating convenience—faster treatment, faster answers

The Workers' Compensation Institute (WCR) identified trust in the employer as a significant predictor for an injured worker's likelihood to return to work after an injury.

An Industry First—A Research-Based Data Model

You've probably heard it a thousand times. An onsite injury prevention program reduces claims and saves money. But how do you know if it's true?

Introducing an industry first: WorkWell OnSite Flex Fit. This onsite data model predicts payback. What's different? The deep approach to data: your claims data, fee schedules, other historical employer outcomes and NCCI data.

Unique research. Field-tested. 70,000 visits over 5 years.

It's easy. It's thorough. And it will uncover a program that pays for itself.

**BETTER
EXPERIENCE**

- Personal relationships
- Trust = ask for help
- Convenience

**CARE AT
WORKPLACE**

- Faster care, less steps
- PTs know workplace
- Coaching advice on site
- Quicker return to work

PAYS FOR ITSELF

- Research-based data model
- Scenarios using your data
- Prevention for free benchmark

Why OnSite Models

Find the Payback in 5 Easy Steps

Once you provide the data, we take care of the work for you.

- Step 1:** Data preparation call
