

OnSite Services: Fundamentals of Value and Scope (Part I) (Online)

Course Overview

Employers are seeing the value of offering onsite services for occupational health, prevention services, post-injury treatment, and disability management. Physical and occupational therapists can be key providers in these initiatives and instrumental in setting up programs to address workplace needs of reducing workplace injuries, facilitating appropriate return to work, promoting population health, participating on ergonomics and safety teams, and helping confront an aging workforce. *OnSite Services: Fundamentals of Value and Scope* is a 4-hour online course outlining the factors driving workplace service provision, situations where these clinics are beneficial, planning for success and demonstrating value at both individual and organizational levels.
